GETTING STARTED

Thank you for selecting the ASX “Trading Wheels” Desktop Application!

A stock market trading game that utilises real time, real world, Australian Stock Market data - Allowing users to practice trading in stocks, in a simulated environment, without any risk to the users real world assets or money.

SYSTEM OVERVIEW

Upon registration, users will be provided \$1,000,000 (simulated, of course!) credited to their account, to get them started. This allows them to purchase stocks, immediately after registration.

Users will be ranked on a leaderboard based off of the profits they've made playing the game, with user scores being updated in real time, alongside the updating and changing stock value.

Trading Wheels also provides the tools necessary for users to track progress, and make informed decisions with regards to future trades. This includes allowing users to view their transaction history, a day by day breakdown of their portfolio value, and graphs showing the value history for each stock.

PREREQUISITES

Users must be connected to the internet & have access to devices such as an Android smartphone and/ or a desktop setup in order to be able to install the application. Trading Wheels is being developed as both a desktop & mobile application so that players can trade on the go!

The user must have a valid email address in order to create an account.

USER ACCESS LEVELS

Admin

The admin is an authorised user with more privileges including:

- Ability to add/ remove stocks currently owned from the user's account in exceptional situations.
- Alter the user balance in accordance to any changes made to an account, any shares added/removed.
- Setting a buy/ sell fee charged when players make transactions.
- Message all users in order to notify them of any changes or provide warnings upon misconduct.
- Delete a user if the admin deems fit. Authority only used in exceptional cases e.g. Unacceptable behaviour.

User

The average player can do all of the following:

- Gain access to detailed Stock Data that allows them to study the stock market.
- Buy/ Sell Stocks with simulated money to imitate real profit & loss according to real data.
- Send Messages between players
- View the Leaderboard to see the top players and view their balance along with how high they rank on the leaderboard.
- Transfer funds amongst other users.

DESKTOP APPLICATION

INSTALLATION

The most recent version of the application can be downloaded from [here](#):
